

Palette options — Q5 in the Decisions table

Each option: light + dark chips, then the same ruling card rendered in both themes. All are compatible with the chosen Option A "reference desk" layout and Swiss Modernism structure.

Option 1 — Referee's kit RECOMMENDED

Original, domain-native semantic system: pitch green = the single accent; yellow card = warnings; red card = errors. High-contrast neutral base. Interview story: the palette IS the domain model.

 Bg light #FFFFFF	 Fg light #171717	 Pitch green #15803D	 Yellow card #B45309	 Red card #DC2626
 Bg dark #0A0A0A	 Green (dark) #22C55E			

Law 15 > 1 The throw-in

No — a goal cannot be scored directly from a throw-in [1].

Ask

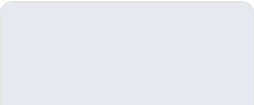

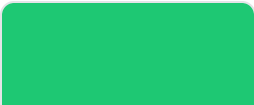

Law 15 > 1 The throw-in

No — a goal cannot be scored directly from a throw-in [1].

Ask

Option 2 — Football Manager-inspired

Approximation of FM's dark match-day UI: deep navy surfaces, panel cards, bright "continue" green, teal secondary. Native register is dark-first — the light theme below is an adaptation FM itself doesn't really have. Brand nod to the planned v2 FM Scout; risk: reads "football gaming dashboard" rather than "rulebook authority", and as an homage it's a weaker originality story in interviews.

 Bg dark #10141C	 Panel dark #1B2431	 Fg dark #E6EAF0	 FM green #1EC873	 Teal accent #2FB3C6
 Bg light (adapted) #F4F6F9	 Green (light) #0B8A50			

Law 15 > 1 The throw-in

No — a goal cannot be scored directly from a throw-in [1].

Ask

Law 15 > 1 The throw-in

No — a goal cannot be scored directly from a throw-in [1].

Ask

Option 3 — Authority navy + gold

The "legal services" register from the design database: navy for trust/credibility, restrained gold accent. Most conservative, most "official document" — but generic (could be any law firm) and gold has no football meaning.
